Subject: Mid-Coast Process maps

Attached are the draft process maps for the Mid-Coast TMDL that Kevin and I produced. The purpose is to help LSAC/TWG members understand the flow of the process and the objectives for each step where they might have input.

Each map is at a slightly different stage of refinement but we want them to all be in the exact same format eventually. The sediment one in particular is still needs the objectives to be included. I haven't had time to update it yet. I should be able to get to that today and will send a revision later on.

I apologize for getting these out a day behind when we said we would. My fault.

Comments are appreciated.

Thanks,
Ryan
